ROSES

TALISMAN

LOS ANGELES

WE know our roses!

The descriptions in this list are necessarily brief. We will be glad to describe the different varieties to you more fully if you will call.

Two Blocks West of Lincoln Avenue

REMARKS

As in the past we are offering only the varieties of roses that by observation we have found to thrive in this locality. Many of the newer roses that are put on the market here, while they may be entirely satisfactory in other localities, are not suited to our Southern California climate.

Each year thousands of second and third grade roses are dumped on the market for most anything they will bring—usually from one-half to one-third the price of first grade roses. Good roses are an investment. They pay dividends through the years in a wealth of fragrant, colorful flowers. At best, cheap roses are a gamble with the chances all against the purchaser.

For fourteen years we have been growing and selling roses in this locality. We know from experience that roses raised here grow far better in Southern California than roses shipped in from Northern California, Oregon, Washington or Texas.

SOUTHERN CALIFORNIA ROSES ARE BEST FOR SOUTHERN CALIFORNIA!

If planting in very light soil or in shaded locations, some varieties of roses will grow much better than others. We'll be glad to recommend the proper roses for your particular soil and location.

The following prices are for dormant bare-root stock. In quantities of 10 or more:

50c roses.....	10 for \$4.50
60c roses.....	10 for \$5.40
75c roses.....	10 for \$6.75
\$1.00 roses.....	10 for \$9.00
Specimen plants in 5 gal. containers—85c and up.	

AUTUMN—Shades of Autumn—red, gold and burnt orange blended into a brilliant rose of large size and exquisite shape. A constant succession of flowers are borne on long, substantial stems. An excellent rose in every detail. Price 60c.

CALEDONIA—A large, full rose of ivory white. Long sturdy stems, delicate fragrance. Excellent for cutting. Price 50c.

CHATILLON—Through Spring, Summer and Fall this dwarf polyantha is positively smothered with small pink semi-double roses. The plant grows thick and compact and is particularly good when used as a border. Price 50c.

CONDESA DE SASTAGO—A rich combination of fiery copper and gold on the inside of the petals and gold on the reverse. Substantial buds that are perfect for cutting, borne on stout erect stems. Foliage is rich glossy green and highly mildew resistant, vigorous grower. A thoroughly fine rose—one of the very best of the newer varieties. Thrives particularly in Southern California. Price 75c.

COUNTESS VANDAL (Patent No. 38)—We consider this one of the very best of the patented varieties. Long pointed coppery-bronze buds open into full petalled flowers that are a perfect blend of salmon and rose. The plant is robust in habit and blooms constantly. Price \$1.00.

DAINTY BESS—Daintily ruffled petals of glowing pink form a perfect single rose that everyone loves at first sight. A constant succession of long stemmed flowers from Spring until Winter will delight you. Price 60c.

DAME EDITH HELEN—For real character we know of no rose that surpasses this variety. Large, heavily petalled rose-pink flowers are borne on strong stems that are often two and three feet in length. Unexcelled for cutting and the fragrance is quite remarkable. Price 50c.

DUCHESS OF ATHOL—A remarkable blending of orange, gold, bronze and burnt orange—a riot of brilliant colors seen in but few good roses. The flowers and buds are full and are borne on exceptionally strong, maroon colored stems. The bush is vigorous in habit. Price 60c.

- DUQUESA DE FENARANDA**—A perfect blend of Apricot-orange and pink. Both flowers and buds are full and are borne in great profusion through the whole season. Price 60c.
- ETOILE DE HOLLAND**—Combine the glowing, velvety red of Hoosier Beauty, the large substantial petals of Dame Edith Helen and the growing qualities of Radiance and you have a fairly good picture of this outstanding rose. Price 50c.
- FRAU KÄRL DRUSCHKI**—An old timer that has been with us for something like thirty-five years and will doubtless be with us for many years to come. Its large well shaped ivory-white blooms never fail to please. Stems are long and the foliage glistening dark green. Price 50c.
- FEDERICO CASAS**—Cinnamon pink in color with gold on the reverse side of the petals. The large double flowers are borne freely through the year. Price 75c.
- FEU JOSEPH LOOYMANS**—There is seldom a time from Spring until Fall that you cannot pick a bouquet of long apricot, yellow and buff buds from this truly wonderful rose bush. As the petals open you will find them light on the tips deepening gradually toward the base making a rare combination of light and deeper shades. Bright green, mildew resistant foliage. Price 50c.
- GENERAL McARTHUR**—Large, full, scarlet flowers borne on a much branched bush. A vigorous grower. Probably the most fragrant of all the red roses. Price 50c.
- GLORIA MUNDI**—A compact growing dwarf polyantha that is covered most of the time with miniature orange-scarlet roses. Particularly suited to borders. Price 50c.
- GOLDEN EMBLEM**—Long, double, golden-yellow buds, that are streaked with heavy crimson markings, open into substantial yellow roses of good size. Foliage is glossy green and quite disease resistant. Not a new rose but still quite popular. Price 50c.
- HADLEY**—Has enjoyed twenty years of uninterrupted popularity and through the years it has lost none of its charm and full, heavy fragrance. The long velvety buds are brim full of grace and loveliness—in the half open flower it is perfection. The bush is sturdy and upright—stems are long. Price 50c.
- HINRICH GAEDE**—Bright vermillion with orange and copper shadings. An all together unusual rose in coloring and one that everyone, who appreciates strong coloring will enjoy. Rich fragrance, strong stems, excellent foliage. Price 75c.
- HOOSIER BEAUTY**—Dazzling crimson, heavily veined with maroon. A velvety sheen covers the open flower and lasts until the last petal has fallen. Produces heavily from Spring until Winter. Grows luxuriantly. Price 50c.
- IMPERIAL POTENTATE**—A clear rose pink without shading. A rose of remarkable shape in both bud and flower. For fragrance it is unsurpassed. Cut, it will keep its form for days. Long stiff stems—few thorns. Price 50c.
- IMPRESS**—A bush of medium height that through Spring and Fall produces quantities of large full deep pink flowers that are tempered with a slight suggestion of orange. An outstanding rose in any company. Price 60c.
- IRISH CHARM**—Long, slender buds of blush pink and apricot open into semi-double flowers of exquisite form and substance. A single bush will provide quantities of cut flowers all through the season. Price 60c.
- IRISH FIREFLAME**—Long, tapering buds of crimson orange open into single flowers of apricot and gold. The dark handsome evergreen foliage forms a perfect background for the fiery flowers. Price 50c.
- ISOBEL**—The largest of all the single roses. Long, slender, coral-red buds. Perfect satiny coral-pink flowers. Few roses grow as vigorously or have as good stems for cutting. Price 50c.
- JOANNA HILL**—Long, perfect, soft yellow buds suffused with the merest suggestion of apricot carry themselves proudly on long erect stems. When open the flowers are full and delightfully fragrant. If you appreciate soft shades you should not be without this rose. Keeps remarkably well when cut. Price 50c.
- J. OTTO THILOW**—Similar to Rose Marie in color, form and fragrance but is borne on stronger stems. An excellent cut flower that really lasts. Price 50c.

-
- KAISERIN**—Full, high centered roses of pure white. No rose is more perfectly formed than Kaiserin. Slightly fragrant, blooms heavily. Foliage is a pleasing light green. Price 50c.
- KATHERINE FECHTOLE** — Daintier and lovelier buds than these slender coppery-orange beauties would be hard to find. Blooms freely on a spreading bush of medium height. Price 75c.
- LADY FORTEVICT** — The foliage and habit of growth greatly resemble that of Golden Emblem but the plant is much more robust. In this rose you may see almost every shade of orange, red and gold. The buds are long and pointed and the open flower is large, double and a riot of color. A thoroughly good rose. Price 60c.
- LOS ANGELES**—Is one of the busiest roses we know. From March until winter it produces a constant succession of large, full flame pink buds and flowers. An interesting rose from the first flaming bud until the last curling petal has fallen. Exceptionally strong grower. Price 50c.
- LOUISE C. BRESLAU**—Would be worth growing for its glistening disease resistant foliage alone. Large, oval, apricot-colored buds are followed by double apricot pink flowers of good shape and texture. Price 50c.
- LUCIE MARIE**—Long, pointed, deep yellow buds splashed with red open into flowers of yellow and copper. The petal tips are slightly tinted pink. A strikingly handsome color combination that you will long remember. Slightly fragrant. Grows vigorously. Price 60c.
- LULU**—Dainty, slender buds of coral apricot. A vase of these buds never fails to bring forth exclamations of wonder and appreciation. A strong grower and a free bloomer. Price 60c.
- MARGARET MCGREDY**—Warms the cool, Fall and Spring days with its brilliance. Pointed buds open into extremely full high centered flowers of bright scarlet tempered with orange. Liking the cool weather it blooms into the Winter, long after most other roses have begun to rest. The bush is extremely vigorous. Foliage is heavy dark green. Price 50c.
- MARY HART (Red Talisman. Patent No. 8)** — Has the stately, erect shape of its parent (Talisman). If you have enjoyed Talisman you will doubly appreciate this exquisite blood-red rose. Spicily fragrant. Flowers and buds are well formed on strong stems. Price \$1.00.
- MAX KRAUSE**—Enormous, golden yellow, high centered flowers of excellent shape that change to shades of apricot in the warmer weather. Presents different color effects at the different seasons of the year but is good at all times. Grows vigorously with stout stems. Strong fragrance. Price 60c.
- MCGREDY'S SCARLET**—Many roses are not too good during Summer but here is one that can be counted upon to furnish a constant supply of long, slender, beautifully shaped rose pink buds during the hottest weather. The bush grows to an astonishing size and doesn't seem to be too particular as to the kind of soil in which it is planted. Price 50c.
- MISS EDITH CAVELLE**—A dwarf polyantha that is covered through the season with small semi-double pink flowers. Particularly useful as a border. Price 50c.
- MISS ROWENA THOM**—Here is a pink rose that does everything in a generous way. The pink round petalled roses are enormous, full and high centered. And the plant itself grows prodigiously fast, sending up strong stems that are often two or three feet in length. Excellent for cutting. Price 50c.
- MRS. A. R. BARRACLOUGH**—Some large roses have the appearance of being too large. Not so with this one. Grace and charm appear in every deep pink petal and every stoutly supporting stem. Buds are cone-shaped, flowers enormous—we have cut flowers six inches in diameter. Intensely fragrant. Price 50c.
- MRS. CHAS. P. KILHAM**—Coral red and orange. Strong, straight stems for cutting. Excellent buds, heavy foliage, vigorous grower, slightly fragrant. Price 50c.

- MRS. DUDLEY FULTON (Patent No. 122)**—Excellent for use as a flowering evergreen shrub as it retains its glossy leaves through Winter. From Spring until Winter its single, silvery-white flowers completely cover the plant. Price \$1.00.
- MRS. E. P. THOM**—When we first saw this rose we decided it to be the best yellow rose we had ever seen. After watching and enjoying it for several years we feel the same way about it. Canary yellow, entirely without shading and such plump, full, high centered buds and flowers! Strong stems and clean foliage. Price 50c.
- MRS. G. A. VAN ROSSEM**—Intense, orange and golden yellow heavily veined with bronze. A quite outstanding color combination. Heavy stems—upright grower. Price 50c.
- MRS. JOHN BELL**—During Spring and Fall an abundance of large, full flowers of cochineal-carmine are borne on strong stems. Brilliant flowers and bright buds of excellent form. Price 50c.
- MRS. LOVELL SWISHER** — A strong, upright grower, bearing a constant succession of long coppery salmon buds that open into enchantingly full roses of salmon-pink. Petals are light pink on the tips shading to salmon at the base. Price 50c.
- MRS. SAM MCGREDY**—Long, pointed high centered flowers of copper-orange heavily flushed with red. Mild fragrance. An altogether lovely rose. Price 60c.
- MRS. W. C. EGAN**—In Summer when the days are hot this rose fades quickly but during Spring and Fall when there is chill in the night air you will be rewarded with quantities of long, heavy buds that will thrill you with their soft shades of pink and coral. We have kept the cut flowers for eight days with only ordinary attention. Price 50c.
- PADRE** — Long petalled coppery-scarlet buds open into flowers of the same color with gold added at the base of the petals. Before the petals fall they change to shades of pink. Strong, erect grower. Price 50c.
- PICTURE**—And a picture it is with its warm perfectly shaped rose pink flowers. A new pink rose that seems to have everything a good rose should have—color, fragrance and excelling cutting qualities. Really fine pink roses are not too plentiful—here is a good one. Price 75c.
- PRESIDENT HERBERT HOOVER**—Yes, we still believe our one best rose is Hoover. It has all of the qualities necessary to a good rose; large well formed buds and flowers, color, some fragrance, strong erect stems, good foliage. And besides all of these qualities it is the strongest growing rose we know. Normally the buds are a deep orange scarlet opening into shades of orange and pink. Before the flower falls the orange gradually changes to a lively creamy pink. Price 50c.
- RADIANCE**—Spring, Summer or Fall we consider this one of our most successful pink roses. Flowers are well rounded and full petalled. It is extremely vigorous, thriving in rather poor soil. The flowers will not burn even in extremes of temperature. Stems are long and upright. Sweetly fragrant. Price 50c.
- RED HOOVER**—A bright red sport of the popular Hoover rose. Growth vigorous, exquisite buds, large, full, high centered flowers. Price 60c.
- RED RADIANCE**—A remarkable rose that holds its rich, cerise-red color and perfect shape through heat, cold or rain. An excellent cut flower. Grows vigorously and blooms freely. Price 50c.
- REV. F. PAGE ROBERTS**—A lovely two-toned bud, soft buff inside and coppery salmon on the reverse side of the petals. A remarkable color combination that is bound to hold your attention. The plant is of spreading habit. Price 50c.
- ROSETTE DE LIZY** — For years you have enjoyed the small buds and flowers of Cecil Brunner. Here is a variety with flowers and buds much the same as Cecil Brunner as to shape but slightly larger and are borne singly on good stems. Color is cadmium yellow with apricot reflexes. The outer petals are dark carmine. As sweet a little rose as you have ever seen. A single bush will bear hundreds of charming flowers. Price 60c.

ROSE MARIE—Long, clear rose pink buds open slowly into full shapely flowers of the same color. The flowers keep surprisingly well when cut. The plant grows vigorously. The flowers are borne freely and possess a pleasing fragrance peculiarly their own. Price 50c.

SISTER THERESE—Perfect chrome yellow buds tinged with carmine and yellow borne on a tall vigorous free branching bush. The open flowers are yellow tinged with apricot and gold. And it's fragrant, too. Price 60c.

SOUVENIR DE MME. CHAMBARD—Voted by French rose enthusiasts as the most beautiful rose of France. Bears full flowers of glistening rose pink. The outside petals are slightly darker than those toward the center. An excellent rose in either bud or open flower. Price 75c.

SOUVENIR DE CLAUDIUS PERNET — Clear, shapely, sunflower yellow buds and flowers on tall erect stems. Flowers are of good form and their keeping quality is excellent. Bright green disease resistant foliage. Thrives in rather shaded locations as well as in the sun. Price 50c.

TALISMAN—A glorious riot of red, burnt orange and gold. It is hard to imagine so much color and symmetry in one rose bud and such charming fragrance too. It has a pleasing habit of upright growth and long, stiff, bright green stems. Price 50c.

TEXAS CENTENNIAL (Patent applied for)—Bright, glowing carmine red. A sport of Hoover that has its characteristics of strong growth, large, full perfect flowers and buds. A new one that should be a welcome addition to any garden. Price \$1.00.

ULRICH BRUNNER — Huge flowers of cherry red are borne on stems that are often three or four feet in length. Will thrive in most any soil. Extremely vigorous and long lived. Price 50c.

VILLE DE PARIS — Holds its bright sunflower yellow color better than any rose we know. The bush is rampant and blooms heavily, will furnish a strong note of color in the rose garden but the stems are sometimes too weak for cutting. Glossy reddish green foliage and few thorns. Price 50c.

VICTORIA HARRINGTON—A magnificent dark red flower that holds its color until the petals fall. Buds long and perfectly formed. It has an intense spicy fragrance and the many flowers are borne on a sturdy bush. Through the hottest part of the Summer the buds and flowers hold their shape and color and unlike nearly all red roses, will not burn. We feel we cannot recommend this rose too highly. Price 75c.

WM. DREER—A rose that closely resembles Los Angeles in shape of flower and in habit of growth. The well shaped, high centered flowers are silvery pink suffused with gold. A good grower and bloomer. Price 50c.

CLIMBING ROSES

Dormant bare root stock 60c, except as noted—

Specimen plants in 5 gal. cans \$1.50 each

CL. BANKSIA — White. Large clusters of small double white roses in Spring. A rampant grower that will cover a lot of territory in a very short time. Holding its bright green foliage through Winter it presents a clean appearance at all times.

CL. BELLE OF PORTUGAL—Through Spring is literally smothered with long salmon pink buds that open into double roses of great size. No rose grows more luxuriantly.

CL. CECIL BRUNNER—Small perfect bright pink buds that appear through Spring and Summer on a strong growing plant. Make up a vase of this rose together with our common blue agathea, the result may surprise you.

CL. DAINTY BESS—A new sport of the popular Dainty Bess bush rose. Large, daintily ruffled single pink roses are borne constantly from Spring until Winter. Price \$1.00.

CL. DAME EDITH HELEN—This climbing sport seems to bloom much better than the bush variety. All through the season it will supply you with huge double, perfectly formed roses with long stems. Leaves are large and attractive.

CL. DUCHESS OF ATHOL—An exceptionally strong growing new variety. Large full flowers of orange, gold, bronze and burnt orange. Handsome, dark evergreen foliage. Price 75c.

CL. ETOILE DE HOLLANDE—Dark velvety red. Bears quantities of beautifully formed roses that are excellent for cutting. Price 75c.

CL. GOLDEN EMBLEM—Crimson, gold and yellow. It seems to us that the high shades of this rose are more pronounced in the climber than in the bush. Grows vigorously. Foliage dark glossy green.

CL. GOLD OF OPHIR—In the early days of Southern California it was planted extensively. It is again in favor and no wonder! In Spring it is a bewildering maze of copper, salmon and carmine. Price 75c.

CL. HADLEY—Carries long stemmed velvety red buds and flowers from March until December. You'll never forget the buds you cut nor will you forget their fragrance.

CL. HOOSIER BEAUTY—Flowers exactly like the bush—huge velvety crimson flowers heavily veined with dark red. The color lasts.

CL. KAISERIN—Creamy white buds opening into clear white high centered flowers of great beauty. The plant climbs freely and blooms through the entire season.

CL. LADY HILLINGDON—Produces a heavy growth of fine purplish wood and bronze green leaves and is therefore excellent when used to form a thick cover on trellis, fence or building. This dark heavy foliage creates an ideal background for the slender apricot yellow buds that appear generously over the plant from Spring until Winter.

CL. LOS ANGELES—It is quite useful in a location where a moderate amount of climbing will suffice as on a fence or not too large pergola. Bears constantly large flame pink buds that you will enjoy cutting.

CL. LOUISE C. BRESLAU—The coral apricot flowers of this sport are better as to size, color and quantity than they are in the bush. The plant grows freely and the shining deep green foliage appears bright and clean through the year. It is one of our most attractive climbers.

CL. MME. EDOUARD HERRIOT—Produces long branches simply filled with large scarlet and coral buds and flowers, and it blooms until Winter. It can be successfully confined in a rather small space.

CL. MERMAID—No other rose we know can be used to advantage in as many places as Mermaid. As a pillar rose, for fences, pergolas or as a cover for banks—in fact anywhere in the sun that a thick cover of glistening foliage is needed you will find it to be indispensable. Pale sulphur yellow, gold centered flowers are borne in profusion all through the season. Price 75c.

CL. MRS. E. P. THOM—If you are partial to plain yellow roses of the best form and quality, you will want this variety. Grows prodigiously fast and certainly is not a slacker when it comes to flowers. The dark thick foliage is attractive too. Price 75c.

CL. MRS. LOVELL SWISHER—Another strong grower bearing through the season, large coppery salmon buds and salmon pink flowers of real form and beauty.

CL. PAULS SCARLET—Does practically all of its blooming before the first of July but until this time, fiery scarlet flowers are borne in heavy clusters over practically the whole plant. Unlike most climbing roses, it generally blooms heavily shortly after planting. Will even grow and bloom on the north side of a building if it has plenty of light. The foliage is heavy and disease resistant and is held well through the year.

CL. PRESIDENT HERBERT HOOVER—Like the Hoover bush, of which it is a sport, this climbing rose grows luxuriantly and displays its wealth of orange scarlet and pink buds and flowers through the season. The high shades of the buds are apt to be more pronounced in the climber than in the bush. Price 75c.

CL. RADIANCE—A strong climbing free blooming sport of the bush that combines long life, vigor and remarkable Summer blooming qualities to make an indispensable addition to the garden. Perfect light to deep pink flowers can be cut from April until November.

CL. ROSE MARIE—You have always admired this variety in the bush. With its bright long rose pink buds and large deep pink flowers, it is still more attractive than the bush. Grows vigorously.

CL. SILVER MOON—Large clear white flowers, yellow stamens. The glossy, bronzy-green foliage presents an excellent appearance through the year.

CL. SOUVENIR DE CLAUDIUS PERNET—We are very partial to this yellow climbing beauty and recommend it as having much merit. The long sunflower yellow buds are perfect in form and are borne on strong stems that are fine for cutting. The foliage is bright glossy green and looks well at any season. Grows vigorously.

CL. SUNBURST—Soft yellow shaded with apricot.

CL. TALISMAN—Buds of red, burnt orange and gold appear all through the season in profusion. Always seem bright and happy. Excellent for cutting. Foliage bright light green. Grows vigorously. Price 75c.

TREE ROSES

Budded at about 40 inches—Price \$1.75

AUTUMN—Bronze, burnt orange and gold.

CONDESA DE SASTAGO—Copper and gold.

DUCHESS OF ATHOL—Gold, bronze and burnt orange.

ETOILE DE HOLLANDE—Glowing, velvety red.

F. J. LOOYMANS—Apricot, buff and yellow.

GOLDEN EMBLEM—Orange streaked with red.

HADLEY—Red.

KAISERIN—White.

LOS ANGELES—Flame pink.

MCGREDY'S SCARLET—Rose pink.

MRS. E. P. THOM—Canary yellow.

MRS. PIERRE DUPONT—Yellow.

PRESIDENT HOOVER—Orange scarlet and pink.

RADIANCE—Pink.

RED RADIANCE—Cerise red.

ROSE MARIE—Rose pink.

SOUV. DE CLAUDIUS PERNET—Sunflower yellow.

TALISMAN—Red, burnt orange and gold.

ROSE CULTURE

PLANTING

After selecting a sunny location for your rose garden, spread cow manure to a depth of four or five inches over the surface of the spot selected. Then spade the ground to a depth of at least one foot. Plant the roses three to four feet apart being sure to keep the bud union at the ground level. Tamp the soil firmly about the roots and water thoroughly.

FERTILIZATION

Roses should be fertilized about September 1 and again about January 15. We consider cow manure the best fertilizer for roses, and the fresher the better. Be generous with it. There is little danger of applying too much.

IRRIGATION

Apply a quantity of water, at each irrigation sufficient to wet the soil to a depth of three feet. The depth to which the water has penetrated may be determined by forcing a small iron rod or hard wood stick into the soil. The rod or stick can easily be pressed into the ground as far as the water has penetrated. Water only often enough to keep the soil moist. We do not recommend "resting" roses, during July and August, except to those who are thoroughly experienced in this operation.

PEST CONTROL

Roses should be sprayed twice each year during August and September, with an oil spray. (This, if done thoroughly, will control red scale.) For aphid spray with any good nicotine spray.

PRUNING

A light pruning about September 1, will stimulate a late Fall and early Winter bloom. In January, roses should have a thorough pruning. This is absolutely essential. If you do not know how, we will be glad to recommend a competent man to you.
